

REMARKS

In the Final Office Action, claims 13, 14, 16-19 and 21 were rejected and claims 15, 20, and 22-27 were objected to but deemed allowable if made self-contained.

Applicants have amended independents claims 13 and 21 to include the generalized element of claim 15. This element is that the group is formed of at least four receivers with one receiver being out of the plane defined by the others. The four receivers are not located in one plane and, hence, enclose a volume. Whether this volume can be defined as "diamond-shaped" or "tetrahedral" is of lesser importance than the out-of-plane location of one of the at least four receivers. Therefore Applicants believe that the currently amended claims do not raise new matter but provide a better definition of the invention as deemed allowable.

Applicants believe that no fees or credits are due or owed in connection herewith. However, in the event that a fee/credit is due/owed, the Commissioner is authorized to charge/refund the fee/credit to Deposit Account No. 19-0615. Two copies of this paper are enclosed.

Respectfully submitted,

William B. Batzer
